Exercises In Physical Geology (12th Edition)

Synopsis

A top-seller for over 35 years with over one million copies sold, this lab manual represents by far the best collection of photos of rocks and minerals and one of the best compilations of exercises available. Provides exercises using maps, aerial photos, satellite imagery, and other materials. Encompasses all the major geologic processes as well as the identification of rocks and minerals. Features new maps and exciting images in every section of the manual. Expands all introductory discussion sections to provide a more comprehensive foundation. Offers an unrivaled collection of photographs, maps, and illustrations. Is published in an oversize book trim size to provide space for larger illustrations, maps, and photographs. A useful self-study tool for anyone interested in learning more about geology.

Book Information

Spiral-bound: 304 pages

Publisher: Pearson; 12 edition (August 9, 2004)

Language: English

ISBN-10: 013144770X

ISBN-13: 978-0131447707

Product Dimensions: 9.5 x 0.7 x 11.7 inches

Shipping Weight: 2.5 pounds (View shipping rates and policies)

Average Customer Review: 3.5 out of 5 stars [See all reviews](#) (22 customer reviews)

Best Sellers Rank: #96,837 in Books (See Top 100 in Books) #5 in [Books > Science & Math > Earth Sciences > Geology > Physical](#) #8 in [Books > Science & Math > Earth Sciences > Geophysics](#) #184 in [Books > Textbooks > Science & Mathematics > Earth Sciences](#)

Customer Reviews

This is the longest most technical book I have ever seen without any kind of index. Whoever thought that was alright for a textbook should have to go back to school and try to use it. The illustrations are useful but difficult to find without an index.

The lab manual itself is fine, except that it was the 7th edition that was shipped. I was looking for the 12th edition and this was listed as a used copy of the 12th edition. I had to come back and order a real 12th edition from the other used texts, in order to have the version in use by the students I am working with.

Purchasing textbooks from the internet is the way to go. I have never had problems with books that I have purchased from . This book I purchased new because the book store on campus charged 4x what sells them for. When the book arrived, wrapped in plastic, new, I noticed upon opening it that the pages were wavy and wrinkled as if it had been wet. This book is printed on special paper due to the detailed graphics of the book. The paper is very susceptible to humidity. I'm not sure where the book was stored, but I think it was in a very humid location. If you plan on selling this book to one of the buy back companies like Textbooksrus...don't. They returned it to me saying the book was water damaged. All in all, it was still much cheaper than the campus bookstore but now I'm stuck with it.

Although it was a lot cheaper on here I'm kind of disappointed. This book was labeled as new, but the front and back covers as well as many pages have wrinkles in them and have bent corners. Not to mention the front page is half way ripped out. Overall the book is in decent condition, but I have a hard time believing it's new.

It looks as if the book was wet at some point-- all the pages are slightly wrinkled or warped. Other than that, all the pages seem to be intact and readable. Everything else was fine. I just didn't expect the wet-looking pages, considering I bought the book new.

The pages are wrinkled and it looks as if this book is damaged by water. This was surprising to me, considering I bought it new. Otherwise fine. It arrived very quickly.

it's a good textbook for beginners in graduate studies. it's not very straightforward and clear in some chapters. you can choose other famous macro books for complement

More tattered and worn out than the listing said it would be, but it got me out of a bind and arrived exactly when I needed it.
