I am a pastor who has a gift of gab and a number of friends, some of them close. My sister (who is the ultimate friendly person) and I were raised by parents who knew how to converse well, so we picked up these skills in a natural setting. We are both real schmoozers. My wife is also highly

relational. So, unlike many self-help book reviewers, I am reviewing from a different perspective: I did not read this book for personal growth reasons (I do read books on other subjects to address my weak spots, however), but to try to help instruct others who struggle here. For many years, I have dealt with folks who wanted to learn to converse and make friends. When one is brought up with those skills, it becomes difficult to enumerate exactly what it is we talkers do. When I read, "How to Start a Conversation and Make Friends," I said to myself, "Yep. This is a lot of what we (and many other people strong in this area) do." Gabor has organized and put into outline form the most basic principles of conversation and friendship initiation. And that is a whole lot more helpful than saying, "I don't know. We just do it!" Gabor also allows for differing personalities and relational styles. Although we may have to leave our comfort zone (in time, change becomes comfortable), we need to be who we are and converse with others based upon who they are. Please understand that this book is limited in its scope. It can help people initiate friendships, but it does not direct one toward relational depth. This book can help folks make a number of casual friends but not necessarily close friends. For deeper communication, I suggest William Backus' book, "Telling Each Other the Truth," a volume that addresses matters like conflict resolution, honesty, etc.

Now before anyone can change how they are they have to accept they have a problem and to really want to change it. Once I realized that I had few friends and I had trouble communicating with others I went on a journey to find help. I found help in this book. "How To Start A Conversation And Make Friends" explains all of the simple things which can be done to have an outstanding effect on your relationships. With this book you learn how to master the art of conversation. By doing this you get to have more friends and better friends. People will like you more and you will find people you like. I noticed that I was being a much better conversationalist after reading the first few chapters! The book is very easy to understand and I flew right through it. Although it is easy to understand it has a lot of info so you have to pay attention to every tidbit. I reviewed a few chapters cause I felt I may have missed something important. When reading the book I found myself saying "Why didn't I think of that?". Everything just seems so logical. We have so many opportunities we just miss and we make people think we don't want to talk and we fail to see how foolish we are. Who would have thought that a smile, a nod of the head, and having open arms would make people approach you! Its so simple and yet we fail to do it. Why didn't I learn this in school? I often feel like I am talking too much about myself. I will ask questions to show interest for other people, but I still feel like I am being egocentric when the conversation ball is in my hand and I am talking about myself. I don't think the book addressed this..
