Yet another excellent book from a series of excellent books by the Pythagorean Illuminati. The Pythagorean Illuminati are an ancient secret society of hyper-rational freethinkers officially organized into a society by the great polymath Pythagoras. Some of the most towering geniuses in history have been members of the Illuminati, these people include: Pythagoras, Heraclitus, Empedocles, Plato, Simon Magus, Hypatia, Leibniz, Weishaupt, Goethe, and Hegel. Throughout history the Pythagorean Illuminati have been working to change this world from the insane asylum it

currently is into a just, rational, altruistic, community based Meritocracy. Just think of the society depicted in Star Trek and you will have a good idea of what kind of society the Illuminati are trying to create. If you would like to help create that type of society then these are the books for you. You should also check out the Illuminati's website, [armageddonconspiracy.co.uk](http://armageddonconspiracy.co.uk) and their facebook page Ancient Order of The Illuminati. The Illuminati have discovered what scientists have been trying to find for years; a Grand Unified Theory of Everything. This Grand Theory is based entirely on the one subject that cannot be argued or debated with; namely mathematics. The Illuminati's "God Series" of books (of which this book "The God Blunder" is a part) focuses on breaking the Grand Theory and the mathematics behind it down in detail. If you aren't very proficient with math (which I am not) don't be intimidated by these books. The authors of all of the Illuminati's books have the most amazing talent I have ever seen at making even the most difficult information understandable to anyone willing to learn.
